

## Concep III Seed Treatment

### Product Overview

Concep® III seed safener protects sorghum crops from herbicide injury and allows preemergence applications of herbicides containing S-metolachlor for ultimate grass and broadleaf weed control. First introduced in 1979 and currently the only proven seed safener marketed for sorghum, Concep III controls the phytotoxic effects of S-metolachlor herbicide for long-lasting weed control to maximize yield.

**Safener applied as seed treatment to protect grain or forage sorghum to allow the use of DUAL® GOLD® and BICEP II MAGNUM brand herbicides.**

### Product Highlights

- Protects sorghum from herbicide injury
- Offers extended use as seed treated with Concep III may be carried over and seeded for a third growing season following treatment and still provide adequate safening
- Flexibility to be tank-mixed with other seed treatments for even greater pest protection
