

# BEARDLESS TRITICALE

# 348 (PVP)

Beardless Wheat  
Bearded Wheat  
Beardless Triticale  
Bearded Triticale  
Barley  
Rye

## Description

348 is a late maturing beardless fall triticale. It is a good option for full season silage or grazing. It can be grazed later than most wheats. 348 responds well to irrigation with aggressive growth in the spring. 348 is tall which is good for dryland and irrigated silage yields. 348 is tolerant to most races of rust impacting wheat.

## Suggested Growing Regions

Texas Panhandle, Eastern Colorado, and Central – Western Kansas

## Primary Uses

Spring Silage Option

Fall & Winter Grazing

Nutrient Mitigation for Livestock Confinement Operations

## Maturity & Agronomics

<b>Maturity</b>	Medium
<b>Yield Potential</b>	High
<b>Plant Height</b>	Tall
<b>Winter Hardiness</b>	Favorable
<b>Seeds / lb.</b>	12,000 - 13,000
<b>Planting Rate Irrigated</b>	80 - 100 lbs/acre
<b>Planting Rate Dryland</b>	40 - 60 lbs/acre
<b>Head Type</b>	Beardless/Awnless
<b>Planting Time</b>	Sept. - Dec.

<b>Plant Height</b>	50 - 60"
<b>Heading</b>	116 days
<b>Leaf Rust</b>	7
<b>Stripe Rust</b>	1

Rating Scale: 1 (Excellent) 10 (Poor)
