

Stored Grain Insect Protectant

WHAT IS STORCIDE II?

Storcide® II* is a liquid stored grain insect protectant that is applied directly to grain for protection from stored grain insects. Those insects include:

Lesser Grain Borer
Angoumois Grain Moth
Tobacco Moth
Granary Weevil
Maize Weevil
Saw-toothed Grain Beetle
Confused Flour Beetle

Larger Grain Borer
Indianmeal Moth
Dermestids
Rice Weevil
Bean Weevil
Red Flour Beetle

Storcide II:

- Provides excellent grain and seed insect protection
- Can be applied for grain bin sanitation
- Registered on wheat, oats, barley, sorghum and rice
- Should be applied to insect-free grain
- Grain can be treated and consumed the same day as treated

Rates of application:

Amount of Storcide II to mix in 5 gallons of water and applied to 1000 bushels of grain

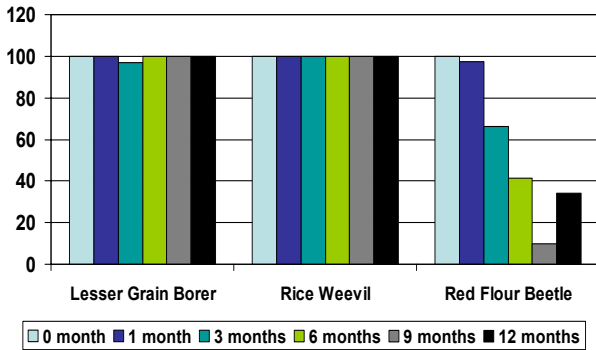

Wheat	12.4 fl. oz.
Oats	6.6 fl. oz.
Barley	9.9 fl. oz.
Sorghum	11.6 fl. oz.
Rice	9.3 fl. oz.

*Contains 3 ppm Chlorpyrifos-methyl and .5 ppm Deltamethrin

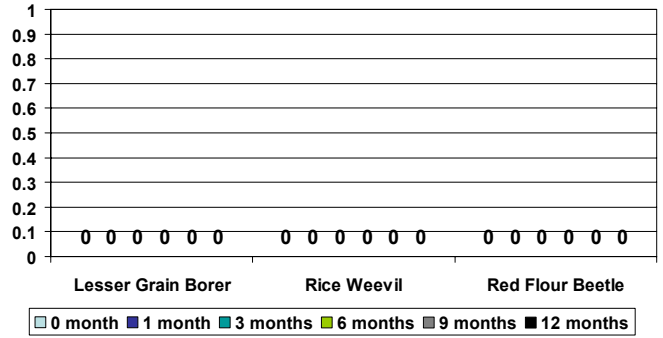

STORCIDE II
%Adult Mortality
0-12 Months

Dr. Phillips and Bon Jour
 Oklahoma State University

STORCIDE II
Number of Progeny Produced
0-12 Months
